

STEP THERAPY

Most medical conditions have many medication options. Although their clinical effectiveness may be similar, prices can vary widely. The Step Therapy program gives you the treatment you need, usually at a lower cost.

HERE'S HOW IT WORKS:

With this program, you must try a Step 1 medication first, before a Step 2 medication may be covered. When you bring a prescription to your pharmacy, our system will automatically screen the medication for step therapy requirements. If your prior pharmacy claims show you have tried a Step 1 medication in the recent past, the Step 2 medication may be filled. If not, the pharmacist will contact your doctor to explain next steps.

We encourage you to discuss your treatment and medication options with your doctor. If you have questions about the Step Therapy program, call the toll-free ProAct Help Desk at **1-877-635-9545**.

- The list is not all-inclusive and does not guarantee coverage. Coverage is subject to change and some medications may be excluded from coverage, for the most current information or if you have questions, please visit www.proactrx.com or call the ProAct Help Desk at **1-877-635-9545**.

THERAPY CLASS	SUB-POLICIES	TARGET DRUGS (STEP 2)	PREFERRED (STEP 1)
Angiotensin Receptor Blockers		Atacand	Candesartan Cilexetil
		Atacand HCT	Candesartan/HCTZ
		Avalide	Irbesartan/HCTZ
		Avapro	Irbesartan
		Azor	Amlodipine Bes/Olmesartan Med
		Benicar	Olmesartan Medoxomil
		Benicar HCT	Olmesartan/HCTZ
		Cozaar	Losartan Potassium
		Diovan	Valsartan
		Diovan HCT	Valsartan/HCTZ
		Edarbi	
		Edarbyclor	Amlodipine Besylate/Valsartan
		Exforge	
		Exforge HCT	Amlodipine/Valsartan/HCTZ
		Hyzaar	Losartan/HCTZ
		Micardis	Telmisartan
	Micardis HCT	Telmisartan/HCTZ
