

Your pharmacy benefit plan's quantity limits program protects you and can help you get the best results from your medication therapy. Along with safe and appropriate doses, quantity limits can also keep prescription drug costs lower for you and your benefit plan sponsor.

DETERMINING QUANTITY LIMITS

Quantity limits are meant to lower the risk of overuse. Quantity limit rules are based on:

- U.S. Food and Drug Administration (FDA) approved uses
- Medication instruction labels
- Accepted or published clinical recommendations

ESTABLISHING GUIDELINES FOR USE

Our review committee of doctors and pharmacists meets often to review medications and consider coverage under pharmacy benefit plans. They also recommend quantity limit guidelines.

- The list is not all-inclusive and does not guarantee coverage. Coverage is subject to change and some medications may be excluded from coverage, for the most current information or if you have questions, please visit www.proactrx.com or call the ProAct Help Desk at 1-877-635-9545.
