

Under the healthcare reform law, Affordable Care Act (ACA), pharmacy benefit plans must cover certain preventative care medications in full without charging a copay, co-insurance, or deductible. These products include:

- U.S. Preventative Services Task Force (USPSTF) A & B recommendations medications
- FDA-approved prescription and over-the-counter (OTC) contraceptives for women
- Vaccines available through a pharmacy

Below are the medications eligible in accordance with guidance from the USPSTF, the Health Resources and Services Administration (HRSA), and the Advisory Committee on Immunization Practices (ACIP). These preventative medications are covered as part of the ACA and are available at no member cost share with a valid prescription.

*Certain drugs may not be covered by your particular pharmacy plan or may be subject to additional requirements or restrictions, regardless of their appearance in this document. Information is believed to be accurate as of the production date; however, it is subject to change.*
